TECHNICAL SKILLS

Languages: Java, SQL, JavaScript, TypeScript

Backend & APIs: Spring Boot, REST APIs, Microservices, Node.js, Express.js, JPA, Hibernate

Databases: MySQL, MongoDB, OracleDB, data modeling, query writing, data validation

Core CS Concepts: DSA, OOP, DBMS, Operating Systems, Computer Networks, SDLC

Cloud & Tools: AWS Services (EC2, VPC, S3, RDS), Docker, CI/CD, Git, GitHub, Postman

EXPERIENCE

Jio Platforms Limited (JPL)

Noida, Uttar Pradesh, India

[Software Development Intern]

Jun 2026 – Sep 2026

- Developed Java and Spring Boot backend features for enterprise applications with focus on clean code, performance, and reliability.
- Built and integrated REST APIs to support data-driven workflows, backend services, and application-level information exchange.
- Tested application changes, fixed bugs, and worked with Git-based code reviews to improve software quality and release readiness.

Insphere Solutions Pvt Ltd

Delhi, India

[Cloud Intern]

Dec 2025 – Feb 2026

- Fixed CI/CD pipeline issues, Docker deployment errors, and AWS infrastructure problems across development and testing environments.
- Automated Docker image build and release workflows using Bitbucket Pipelines and Amazon ECR to reduce manual deployment work.
- Deployed containerized applications on Amazon ECS and AWS Fargate, supporting scalable and consistent cloud application delivery.

PROJECTS

Offline Mesh Payment Simulator

[GitHub](#)

(Java | Spring Boot | Spring Data JPA | MySQL | REST APIs | JUnit)

- Built a Spring Boot backend that simulates offline payment routing across a virtual mesh network using REST APIs and MySQL.
- Designed deferred transaction handling so payments can be stored, routed, and settled when network connectivity is restored.
- Added RSA, AES-GCM, SHA-256, transactions, and optimistic locking to protect payment data and handle duplicate requests safely.

Deep Packet Inspection and Packet Analyzer

[GitHub](#)

(C++ | CMake | PCAP | TCP/IP | TLS SNI | Multithreading | Network Security)

- Built a C++ packet analyzer that reads PCAP files and extracts Ethernet, IPv4, TCP, UDP, port, protocol, and packet metadata.
- Used deep packet inspection to read TLS SNI and HTTP host data, classify traffic, and apply IP, application, and domain blocking rules.
- Created a multi-threaded processing flow with load balancers, worker threads, flow tracking, output PCAP writing, and traffic reports.

Work-force Pilot- Company Portal

[GitHub](#)

(Angular | TypeScript | Spring Boot | REST APIs | JPA | OracleDB | Chart.js)

- Built a full-stack Company portal with Angular and Spring Boot to manage employee records, leave requests, role-based views, and dashboard reports.
- Implemented employee CRUD, form validation, login/signup flows, leave application, and HR approval or rejection workflows using REST APIs.
- Added department-wise employee analytics and leave tracking with Chart.js, helping HR users monitor workforce data instead of only storing records.

EDUCATION

Manipal University Jaipur

Rajasthan, India

Bachelor of Technology in Information Technology

Oct 2022 – Jul 2026
